- 6 7.3 mi to Neptune (along the trail)
- 7 10.5 mi to Pluto at the Kincaid Chalet

Makes roughly 10.5 mi one way

Tony Knowles Coastal Trail

Start Downtown, End in Kincaid Park

The Tony Knowles Coastal Trail offers a breathtaking experience for outdoor enthusiasts and nature lovers of all skill levels. The trail provides a perfect opportunity to immerse yourself in the stunning beauty of Anchorage's unique coastline, with its picturesque views of the mud flats and the surrounding mountains. Whether you're walking, jogging, or biking, the well-marked, relatively flat trail ensures a safe and enjoyable journey.

With its accessibility from multiple points in downtown Anchorage and its length stretching almost 11 miles, the Tony Knowles Coastal Trail offers an unforgettable and refreshing escape into the natural wonders of Alaska.

Light Speed Planet Walk

The Light Speed Planet Walk in Anchorage is a scale model of the solar system that stretches along the Tony Knowles Coastal Trail. It was designed by local high school graduate Eli Menaker. The walk starts at the Sun, located at 5th Ave & G Street, and ends at the Kincaid Chalet, roughly 10.5 miles away. On the path, each step represents about the distance light travels in one second (300,000 kilometers or 186,000 Mile).

Tikahtnu or Nuti

The Dena'ina place name for Cook Inlet, meaning ocean river or salt water
